Small 4to. 152p. written in a clear hand (excluding blank leaves), some ll. excised at front, shaken in the original cloth, front hinge cracked, handbill for a performance by Suzanne Devoyod loosely inserted, related MS notes loosely inserted at rear.

Doris Todd worked as governess to the family of Dr. Louis Goudard in Pau, in the Pyrenees in the south of France (Goudard was author of *Le Climat de Pau*, 1902). Her diary, written continuously in her book if not daily, records details of the time she spent with the family and friends in and about the town. She also mentions some of the early aviators drawn to Pau after Wilbur Wright moved his family to the town in February 1909. She refers to Blériot (p. 42), and reports that "Mr Hewitson - the consul - said that people came to Pau principally for the aviation now. There are about 50 officers learning to pilot aeroplanes, all for war of course. . . All the best French aviators are here now, Védrines, Leblanc, Bellanger & others. I believe the Docteur knows Védrines & Leblanc" (p. 51). Later she visits "the aviation field . . . about five miles out of Pau" for a "fête d'aviation", and sees for the first time a biplane (p. 91). On Tuesday 16 January 1912 she and friends go "to hear Dr. Charcot at the Palais d'Hiver. He is an explorer & has led two French ex. to the South Pole. He spoke of Shackleton & Scott & it was interesting. The Palais d'Hiver was crowded . . . Charcot is a fine looking man - handsome in the French way. There were about 200 magic lantern slides & at the end a few cinematograph films of the departure of the boat & various experiences en route . . . I think all the seats have been booked for this lecture for three weeks, so we were lucky . . . you should have seen the penguins in the cinematograph! they were so comical" (p. 57). She recounts Charcot's

story of how he and a colleague watched a seal and her pup: "He saw the sailor had a 'petite larme [little tear]' in the corner of his eye & he knew he was thinking of his children, & he himself felt a 'petite larme' in the corner of his in thinking of his own little ones at home, & he said the mother seal seemed to know that she had nothing to fear from them that day". She concludes "I feel as though I had been to the Antarctic regions myself" (p. 58).

Cherry-Garrard’s account of his journey with Wilson and ‘Birdie’ Bowers to collect an unhatched Emperor penguin egg during Scott’s last expedition went through many editions after the first of 1922. This 1965 edition was the first to appear after Cherry-Garrard’s death, and it carries a biography of him by George Seaver as foreword.

Beddie 1972. "In the years before the French Revolution changed everything writers across Europe produced eulogies of Cook, praising him as a standard-bearer of the Enlightenment . . . Pierre Lemontey's prize-winning 'Éloge de Jacques Cook' (one of twenty essays on Cook submitted to the Academy of Marseilles) followed the same theme when it portrayed him as 'representing the best in a European civilization in the process of renouncing its murderous, barbaric practices when confronted with the native inhabitants of regions'. For Lemontey, who came from a merchant family, Cook's discoveries promised a new kind of global commerce between Europe and the South Seas, based on mutual benefit rather than force" (Glynn Williams *The Death of Captain Cook. A Hero Made and Unmade*, pp. 68-9). This copy of Lémontey's eulogy is bound with several other similar works, including Jean Chas's *Réflexions sur l'Éloge de Bernard de Fontenelle* (1785) and his *Réponse aux Réflexions de M. Following the East Greenland coast, they attained a new highest north (77° 38'N) and discovered new land, the Ile de France. Ice prevented further progress, and the Belgica returned to Ostend via Iceland. *A Travers la Banquise* contains the sponsor's narrative of the expedition, and has now become a somewhat scarce title.

49. Dufferin, Frederick Temple Hamilton-Temple-Blackwood, first marquess of Dufferin and Ava (1826-1902).

An author's letter signed to "My dear Sigurdr", the Iclander who accompanied him on his travels as described in *Letters from High Latitudes*, Dufferin Lodge, Highgate, Feb. 19, 1862. £125

8vo. 3pp. on black-bordered stationery; slight age-toning, creased where folded, else very good.

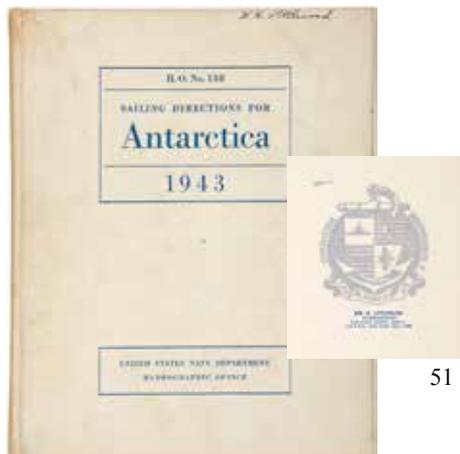

Lord Dufferin's *Letters from High Latitudes* described his yacht voyage to Iceland, Jan Mayen and Spitsbergen in 1856. The second chapter of the book opens "I found the Iclander awaiting my arrival here - pacing up and down the coffee-room like a Polar bear . . . I already feel I shall hereafter reckon Sigurdur . . . among the number of my best friends". The present letter, written from Dufferin's London estate in Highgate, begins "What a time it is since I have heard any thing of you. I send this letter as Noah did his dove in the hopes of it returning to him with an olive branch. I have been to many places since we last heard of each other, and sometimes in the track of Harald Hardrada . . . I suppose you have read Dasent's book: what a grand book it is". He signs off "Dufferin", and then adds a note: "Our friends of the North Cape Mr. & Mrs. Thomas Lane returned to Norway, but I fear sadly shattered in health, and well-nigh broken hearted by the loss of their bright little Emma, who you must remember, who died in Chili of malignant fever a few weeks only before they started to return to England".

50. [Dumont D'Urville, J.] A prospectus for *Voyage au Pole sud et dans l'Océanie, sur les Corvettes l'Astrolabe et la Zélée*, issued by Librairie de Gide. [Printed by A. Pihan de la Forest, imprimeur de la Cour de cassation, rue des Noyers, 37], n.d. c. 1844. £1,250

8vo. pp. 8; fine in self-wrappers as issued.

Not in the usual bibliographies. Dumont d'Urville's account of the Antarctic and Pacific explorations of the *Astrolabe* and *Zélée* in 1837-1840 was published between 1841 and 1854, much of the work appearing posthumously. This pamphlet prospectus, issued by the Librairie de Gide, announces the publication of the work, with a description of the contents on the first four pages, a more analytical presentation of the contents of the narrative on pp. 5-6, and a "Division de l'Ouvrage" on pp. 7-8. The final page also advertises the price to subscribers for the entire work, each part of which is to be sold separately, and the announcement that a few copies de luxe will be printed on "papier grand colombier vélin". The publisher emphasises that appearance of the work will not be delayed by the death of Dumont D'Urville (in 1842), and a final note lists the parts of the work already available for purchase. Presumably this was not the first prospectus for the publication to appear, and there may have later versions, but this example is the first that we have seen.

This extraordinary sheet contains the names of some of the foremost figures in exploration during the late 19th and early 20th centuries. Henry Morton Stanley, famed for finding David Livingstone in Africa, subsequently crossed the continent. Fridtjof Nansen attained the highest north latitude aboard his purpose built ship Fram. Byrd undertook Polar expeditions north and south, reaching the Poles by plane. The signatures are dated "New York Dec 2d 1886", "New York Jan 24 98", "April 23d 1923" and "New York June 26, 1926" respectively.

The book reproduces from his journal descriptions of hunting expeditions to Spitsbergen via Norway, Greenland, British Columbia, and Alaska, illustrated with his own photographs. The book was intended for presentation by the author, and in other copies the preprinted leaf bound at the start of the book was completed with the author's dedication; in this copy the leaf has not been completed. There are also variants of the binding, the two versions we have seen including the present version, and an ornate leather binding often in poor condition.

74. Kane, Elisha Kent. *Arctic Explorations: The Second Grinnell Expedition in Search of Sir John Franklin, 1853, '54, '55. Philidelphia: Childs & Peterson*, 1856. **£175**

First UK edition. 2 vols. 8vo. pp. 464 & 467; frontis. and addn. eng. title to each vol., 3 maps inc. 2 folding, 18 plates; some foxing to a few plates, light staining to some upper margins of vol. II, else very good in the original cloth, gilt, overall mottling to cloth. Ownership inscription of Ann Shirley to flyleaf of vol. I.

AB 8373; Sabin 37001. In 1850-1 an expedition led by Lieut. Edwin de Haven, and sponsored by the whaling magnate Henry Grinnell, went in search of Sir John Franklin; Elisha Kane joined the expedition as surgeon. On its return Kane toured the USA, lecturing about his experiences, and promoting a second expedition. Grinnell once again funded it, and Kane with a crew of eighteen were joined by Hans Hendrik and Carl Peterson in Greenland. The expedition penetrated to the far north of Greenland and Ellesmere island, following the discovery of the Kane basin and the Kennedy Channel. When their ship became caught fast in the ice, Kane and his men abandoned her and eventually reached safety, albeit with loss of life. Kane died only a few years after his return from the expedition, but his work in the Arctic marked the beginnings of US involvement in the region. The present work contains his account of the expedition that he led.

First edition. 8vo. pp. 32; very good in the original printed wrappers, slightly chipped to spine.

Apparently not in the AB. Thomas was the brother of the Arctic explorer Dr. Elisha Kane and also his literary executor. Elisha, who died in 1857, had accumulated material on Russian America - Alaska - with respect to its providing access to the Arctic and for this reason Thomas was invited to lecture on the subject.

76. Lambert, Gustave. *L'Expédition au Pole Nord. Paris: Au Siège de la Société*, 1868. **£150**

First separate edition. 8vo. pp. 134; one coloured folding map; contemporary roan-backed boards from the library of the Naval Officer's Society, Stockholm, with inkstamp to title-page and bookplate, classmark to foot of spine.

AB 9632. Lambert's article appeared in the *Bulletin de la Société de Géographie*, of which this is an offprint. Lambert proposes a French expedition, paid for by public subscription, to the North Pole via the Bering Sea. The expedition never went ahead, but his paper provides useful information on scientific knowledge of the day, and on opinions as to the different routes that could be taken.

77. [Lambert, Gustave.] 'Le Capitaine Lambert, par Gill.' A caricature of Lambert, together with a brief article about him, in a single issue of *L'Eclipse*, No. 75, 27 June 1869. [*Paris: Imprimerie Vallée*], 1869. **£45**

First edition. Folio. 4pp.; front page caricature of Lambert dressed in a Polar bear costume, eating a boule of ice-cream, unrelated wood-eng. illust. to final page; very frayed and creased with loss, good only.

The French artist André Gill was one of the most famous caricaturists of his day; his work appeared in *L'Eclipse* from 1868 to 1876, and his targets included Bismarck, Zola, Victor Hugo, Garibaldi, Charles Dickens, and Darwin. This satirical image of Lambert accompanies a brief article on p. 2 titled 'Le Pole Nord' (The North Pole) by 'Le Cousin Jacques', which equally mocks Lambert's well-known plans to reach the North Pole - citing his failure to raise funds as the obstacle to him becoming 'the Christopher Columbus of the ice'.

He rates alpinists as the most suitable potential explorers of south-east Iceland by dint of their experience with Alpine terrain, and gives details of the as yet unattempted peaks to be found there. A postscript added for this edition advises an exploration route suggested by "Mr. Kral Franz Siemens, an Iceland merchant", that takes in ascents of Hekla, Oræfa and Kötlugjá.

First eds. 8vo. pp. xiv, 468 & xvi, 198, [1, List of Plates]; 7 engraved plates inc. frontis. and 1 folding map to first work, folding engraved map frontis., 6 engraved plates & 1 engraved diagram to second work; minor offsetting from plates to text, else very good in contemporary uniform half calf, raised bands to spines with gilt to compartments, lettering piece to one compartment, a handsome set.

AB 105530 & 10531; Sabin 42851 & 42853. Lyon accompanied the second Parry expedition in search of a North West Passage as captain of Hecla (1821-23; Parry commanded the Fury). His *Private Journal* of the voyage supplemented Parry's own, official account of the voyage. The expedition proved of importance for the successful co-operation between the Europeans and the Eskimo encountered; indeed, by the aid of a sketch map of the area Parry discovered a potential route from one of the Eskimo. Lyon observed closely the habits and character traits of the different tribes of Eskimo and the *Private Journal* offers an excellent description of them. Lyon sailed with Parry again in 1824, this time to attempt a crossing of the Melville Peninsula. Lyon's narrative of the voyage as far as Wager Inlet and Repulse Bay contains information about Southampton island and the Eskimos of the region.

First edition. 4to. pp. 364, [2, blanks] + CLXXIV (illusts. from photos.); single page coloured map, sketch maps to text, two folding maps in rear pocket; heavily bumped to upper outer corners affecting some pages, crinkling to leaves of illusts., else good in the original printed wrappers, which are chipped and worn on spine with a little restoration, lower joint partly split.

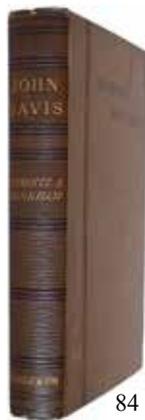

Rosove 218.A1; part of Spence 74 & Renard 1032. The publication of scientific reports resulting from Mawson's Australasian Antarctic Expedition began in 1916, and was not completed until 1947. The leader's own report, forming the first volume in the series, did not appear until 1942, and it contains his summation of the course of the expedition and its scientific work, related in a spare prose suitable for this format (a popular account of the expedition had already appeared in 1915 as *The Home of the Blizzard*, a partly rewritten and abridged version appearing in 1930). The quality of production of this volume seems to have been determined by wartime availability, and the printed wrappers of many copies suffer from wear and tear - this copy has survived better than most.

AB 11983. Nansen's extraordinary expedition aboard the Fram, 1893-96,

attempted to attain the North Pole by drifting in the ice with the currents northwest from the New Siberian Islands across or near the pole. The Fram was purpose-built to withstand the grip of the ice. In the event, the drift carried the expedition south of the pole, and Nansen and Johansen attempted to reach the pole on foot. They attained a new "Farthest North", and eventually made their way back to Spitsbergen, where they were rescued by the Jackson-Harmsworth Expedition. This second British edition of Nansen's account is distinguished from the first by the finely and elaborately decorated binding.

cosmic matter fallen to earth. Chapters by A. G Nathorst, F. R. Kjellman and others examine botany, entomology, and art among the peoples of the regions visited.

113. Nordenskiöld, Otto . Från Eldlandet. Skildringar från den Svenska Expeditionen till Magellansländerna. Stockholm: F. A. Norstedt & Söners Förlag, [1898]. **£1,250**

First edition, complete in four original parts. 8vo. pp. [1, title-page], 254, [1, contents leaf]; 23 photo. plates, one large folding map ("Map of the Magellan Territories"); very good in the original printed wrappers, some fraying to extremities with minor loss, upper wrapper of first part nearly detached, small splits to hinge of other parts, the map loosely inserted at rear of the fourth part.

In 1895, Otto Nordenskiöld led an expedition to Tierra del Fuego, with a party that included Per Dusén as botanist and Axel Ohlin as zoologist; Nordenskiöld himself took part as a geologist. "Our general object was to study the physical geography and natural history of Tierra del Fuego and of the southernmost part of the continent, and our special purpose to compare the natural features of those regions with the corresponding ones of Northern Europe and to bring home collections of sub-Antarctic forms, the subsequent study of which might stimulate the interest in Antarctic exploration" ('Notes on Tierra del Fuego', *The Scottish Geographical Magazine*, 1897, p. 393). The expedition spent the season 1895-6 in collection and research, and with the permission of the Chilean and Argentine governments was able to explore both coastal and inland areas to a greater extent than any previous scientific expedition. Nordenskiöld himself returned alone in 1897 to continue his work in Southern Patagonia and the environs of Useless Bay in Tierra del Fuego, not previously visited by the expedition. His narrative of the expedition, the title of which translates as 'From the Land of Fire. Sketches from the Swedish Expedition to the lands of Magellan', appeared in Sweden in 1898, but was not translated into other languages. It was issued both in the present parts version, and in a single volume bound by the publisher. This parts issue is exceptionally scarce, though copies of the work in general are not common. The findings that Nordenskiöld made on this expedition prompted him to foster plans for an Antarctic expedition, resulting in the Swedish Antarctic expedition he led in 1901-4. By a curious coincidence, the Argentine naval vessel that landed the Swedish party in Tierra del Fuego in 1895 was the Uruguay, the same ship that rescued Nordenskiöld and his colleagues from the Antarctic at the end of 1903.

A celebration of Nordenskiöld's voyage on the Vega, with overview, selected illustrations, and a time-line of the expedition.

Of note are two poems on the Arctic: 'The Attempts made of late Years to Find a North-West Passage' by George Stovin Venables (1831), and 'The Arctic Regions, and the Hopes of Discovering the Lost Adventurers' by Frederic W. Farrar (1852), which took as its theme the lost expedition of Sir John Franklin. A second volume of prize poems appeared in 1894, collecting poems from 1859 onwards.

119. Parry, William Edward. Narrative of an Attempt to reach the North Pole, in Boats fitted for the Purpose, and attached to His Majesty's Ship Hecla, in the Year MDCCCXXVII. *London: John Murray, 1828.* **£1,500**

First edition. 4to. pp. xxii, [i], 229; frontis. and three steel-eng. plates, two maps, one large folding map at rear; a fresh clean copy in contemporary full calf, gilt decorated spine, lower joint slightly cracked but still firm, chipped with slight loss to head of spine, still a handsome copy.

AB 13146; Books on Ice 2.9. Parry's fourth, and final, expedition used sledge-boats to attempt to reach the North Pole via Spitsbergen. The sledging teams attained a new highest north, of 82° 45'N, a latitude not surpassed until the Nares expedition of 1875-6. Among those who joined Parry were James Clark Ross, and Francis Crozier, both of whom were later to undertake an expedition to the Antarctic (Crozier also took part in Franklin's ill-fated expedition as captain of the Terror).

The expedition ship Tegethoff sailed from Norway to Novaya Zemlya, where she became stuck in ice. A series of sledging journeys and, the subsequent discovery and detailed exploration of Franz Josef Land, compensated for the eventual loss of the ship. The expedition returned to Novaya Zemlya by sledge and boat, just before supplies ran out.

123. [Photograph Album. Greenland & Iceland.] Iceland Greenland 1945-46 [so titled to upper cover].

£750

A personal photograph album relating to Thomas W. Hopkins of the US Air Force, containing 324 photographs and 25 postcards, the photographs approx. 7 x 4 cm or 9 x 13 cm, a few smaller in size, occasional annotations to rear of photographs, the postcards mostly posted from Iceland; leaves on which the photograph mounted a little brittle with some occasional marginal tears, the photographs and postcards themselves in good order, overall very good in limp leather boards, tooled lettering to upper board.

This album contains photographs taken, and postcards sent, by Thomas Hopkins while on service at the end of the Second World War and shortly afterwards. Some of the images show the ground- and aerial-views of the airforce base on Greenland at which Hopkins was presumably stationed. Others show Hopkins and others during excursions in Greenland and Iceland, with views of glaciers, mountains, geysers, and similar. Hopkins seems to have got to know some of the Greenlanders near the base, and there are images of them at work and play, including photographs of kayakers and children. The album relates to the development during and after WWII of a network of airbases and weather stations in Greenland. Hopkins seems to have been based in the south - several of his photographs show Tunugdliarfik Fjord - and the majority of his photographs show Greenland (236, including some colour images of snow effects). He also spent time in Iceland, and the postcards all relate to this part of his service (several were sent to his family in Houston, Texas).

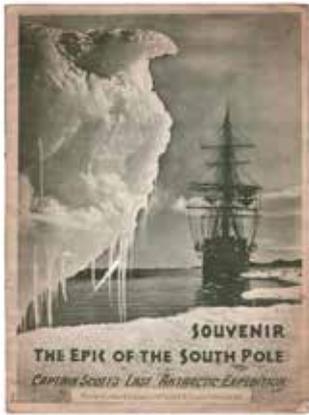

124. [Photograph album.] A personal photograph album recording holidays to the Alps, Scandinavia, Holland and Ireland in the years 1936-8.

£175

Oblong 8vo. approx. 330 snapshot photographs, many captioned by hand, seven hand-drawn vignettes of mountains, two large hand-drawn panoramas from the Eggishorn and the Schynige Platte accompanying handmade photographic panoramas of the same; contained in the original plain black rexine album.

This anonymous album contains snapshots taken on holidays to the Alps in July-August 1936 and March 1937, a tour of Sweden and Spitsbergen in July-August 1937, a visit to Holland in April 1938, and to Ireland in September that same year. The Scandinavian photographs illustrate a journey from Stockholm to Lake Torneträsk in Swedish Lapland (20 images record the local people and landscape), to Trömsö via North Cape to Spitsbergen (68 snapshots show Kings Bay, Magdalena Bay - where the compiler went ashore - Fowl Bay, and Red Bay), returning to Stockholm.

original pictorial wrappers, which are age-toned with abrasion to upper wrapper with minor loss, chip with slight loss to lower wrapper, contained in contemporary plain brown wrappers.

Spence 929; Renard 1242 ("very scarce"). This souvenir programme for a screening of Ponting's film was issued by the British Empire Film Institute, founded in 1926. The Institute's council, which included Rear-Admiral E. R. G. R. Evans, a member of Scott's expedition, selected Ponting's record as the first film to be acquired for the "National Gallery of British films" (front wrapper). The film was screened at the Royal Albert Hall on February 26th, 1929, and presumably this souvenir relates to a later screening of the film, perhaps at the Institute itself.

First separate edition. 8vo. pp. 50; wood-eng. illu. s. after photographs by Rabot inc. several full-page; very good in the original printed wrappers, previous owner's inkstamp to upper wrappers, chipped with a little loss to spine.

127. Ross, Sir John. Explanation and Answer to Mr. John Braithwaite's Supplement to Captain Sir John Ross's Narrative of a Second Voyage in the Victory, in Search of a North-West Passage. *London: A.W. Webster, n.d. [1835].* **£1,750**

First edition. 4to. pp. 8; slight foxing to contents, else very good in the original printed wrappers, a few minor creases.

AB 14862. Ross was a keen proponent of steam-power in exploration. In 1829, he set off on the paddle-steamer Victory in search of a North West Passage, but the failure of the boilers compromised the expedition. Ross's narrative of the voyage (1835) contained criticisms of the boilers used on board the ship; these prompted a rejoinder by one of the patentees, John Braithwaite. The present very scarce pamphlet offers Ross's own point-by-point refutation of Braithwaite's charges, and can be seen as an adjunct to Ross's official narrative.

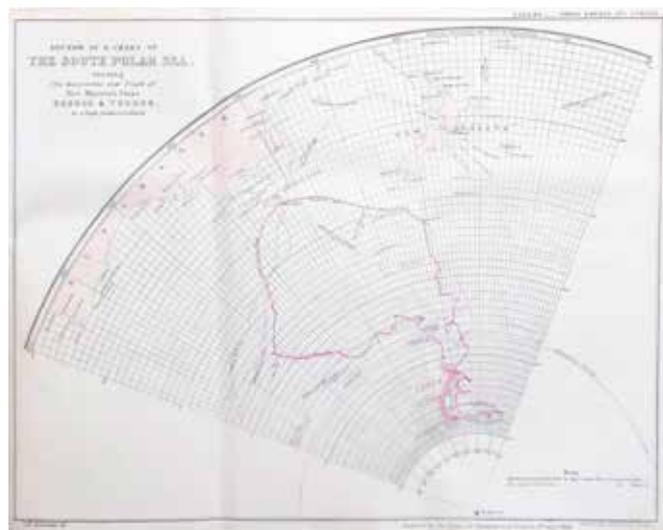

128. Ross, Sir James Clark. *A Voyage of Discovery and Research in the Southern and Antarctic Regions, during the Years 1839-43.* London: John Murray, 1847. **£10,000**

First edition. 8vo. 2 vols. pp. lii, [i], 366 & [v]-x, [i], 447, 16 (ads.); 8 litho. plates inc. one folding, wood-eng. vignettes to chapter fly-titles and occasionally to text, 8 charts and maps inc. 3 folding; slight marginal age-toning, else very good in contemporary half calf, gilt, expertly restored to head of spines. A presentation copy from the author, inscribed to vol. I: "C. J. Beverly Esq. With the warm regard of his old friend and messmate J. C. Ross".

Denucé 2467; Spence 993; Renard 1328; Rosove 276.A1.d ("Scarce"). An important work of Antarctic exploration: Ross's expedition was the first officially to sight the Antarctic continent. Incorporating a scientific programme that included the establishment of observation stations around the southern hemisphere, the expedition also sailed three times into Antarctic waters, making a circumnavigation of the continent. Ross spent some time writing his narrative, which was printed in a run of 1500 or so copies. This copy bears an additional Polar association, since the recipient, C. J. Beverly, served with Ross on the 1818 expedition in search of the North West Passage led by John Ross, uncle of James. Charles James Beverly (1792-1866) joined the Arctic expedition as Assistant Surgeon, but was badly affected by snow blindness. He subsequently was appointed Medical Superintendent of Bethnal Green Asylum where, with John Warburton, he made improvements to the welfare of the patients, including the provision of a library. An unusual explorer-to-explorer association copy.

129. [Ross, James Clark.] *Ships Erebus and Terror. Extracts from the Despatch of Captain James Ross, from Van Diemen's land, Showing the Nature and Extent of the Discoveries Made in a High Southern Latitude by Her Majesty's Ships Erebus and Terror. First edition. Folio. pp. 3, [1, docket title]; one large folding track map; library class-mark to verso of first leaf, else very good, bound with seven unrelated Parliamentary works, many with folding plates; ex-libris Bath Public Reference Library with their accession numbers to each work, ex dono Alfred Jones of Bath with bookplate to front pastedown, contemporary half calf with leather lettering pieces ("Parliamentary Papers", "Scientific Subjects"), minor wear to extremities.

Spence 992; Renard 1325; Rosove 275.A1. "This is the first report of the first season's stupendous geographical discoveries, composed of extracts from Ross's dispatch sent from Australia, 7 April 1841, upon the expedition's return from the Ross Sea. The report was prepared 28 August 1841, printed on 6 September 1841, and presented to the House of Commons the following day. How many copies of this remarkable publication were printed is uncertain; Edward Sabine, who prepared the expedition's reports on magnetism and was a friend and supporter of Ross, himself purchased thirty. Certainly very few are extant today" (Rosove).

130. Ross, James Clark (1800-1862). Captain James Clark Ross R.N. F.R.S. F.R.A.S. F.L.S. &c. Discoverer of the North Magnetic Pole. *London: Colnaghi & Company, 1835.* £775

A fine mezzotint portrait of Ross, engraved by R. M. Hodgetts after J. B. Wildman's original, image size approx. 8 1/2 x 10 1/2" (215 x 265mm), overall size 12 x 15" (305 x 380mm), light tide-mark partially affecting image, else in very good condition, the mezzotint itself a fine dark impression.

This heroic portrait of Ross commemorates his discovery of the North Magnetic Pole on 31st May, 1831. Ross had joined the Arctic expedition led by his uncle Sir John Ross in search of a North West Passage, during the years 1829 to 1833. The expedition had considerable success, not least Ross's discovery of the Magnetic Pole, then at the Boothia Peninsula. Ross went on to lead an equally successful expedition of his own to the Antarctic, during the course of which the first official sighting of the Antarctic continent was made.

131. [Ross, James Clark (1800-1862).] A portrait of James Clark Ross after an original by Negelen, *J. Graf, Printer to her Majesty*, n.d. after 1837. £475

A lithographic head and shoulders portrait of Ross, on india paper size approx. 11 x 14" (280 x 360 mm), full plate size 12 1/2 x 17" (320 x 430mm), printed signatures of artist and sitter below image; abrasion and other marks to upper right of image, small indentations to lower half of portrait, creased and torn to margins of plate outside the india paper, substantial repair to paper at upper right of plate just touching corner of india paper, good.

This rare portrait of Ross was published, to judge from other examples of the printer's lithographs, sometime between the years 1838-1859; Ross's relative youth in the portrait suggests a date towards the start of this period, possibly just following his return from the Antarctic.

132. Ross, James Clark (1800-1862). A carte de visite portrait of Ross. *London: Maull & Polyblank*, n.d. c. 1860. £175

A full-length portrait carte de visite, printed details of studio to verso, identified in pencil to verso, VG.

The fund resulted in the dedication of a statue to Shackleton on the north wall of the Royal Geographical Society. The unveiling took place on the 9th January, 1932, and among those present were Shackleton's long-time supporter Hugh Robert Mill, and the Marquess of Zetland. Transcriptions of the speeches given at the unveiling were printed in the Society's Journal, and the present item offers an offprinted version of this article, together with the original leaflet of 1923 which announced the inception of the fund.

148. [Spitsbergen.] Henry Ashton Barker. Description of a View of the North Coast of Spitzbergen, Painted from Drawings taken by Lieut. Beechey, who accompanied the Polar Expedition in 1818; which is now exhibiting in the large Rotunda of Henry Ashton Barker's Panorama, Leicester-Square. An interesting representation of the City of St. Petersburg, is open in the upper circle. *London: Printed by Jas.-W. and Chas. Adlard, 23, Bartholomew-Close, West Smithfield, 1819.* £750

8vo. pp. 12; large folding copper-engraved plate, keyed to text; small marginal repair to final leaf of text, else a very good untrimmed copy in later cloth-backed marbled boards, leather lettering piece to upper board.

This scarce ephemeral item was sold for sixpence as a guide to the Panorama of the 1818 Polar expedition exhibited at London's Leicester Square. The expedition, briefly described in the text of the booklet, was undertaken in the Dorothea and the Trent under the general command of David Buchan. Frederick Beechey served on the Trent under the general command of John Franklin and was later to publish an account of the expedition (*A Voyage of Discovery towards the North Pole*, 1843). The large 360 degree panorama was based on his illustrations, and is reproduced here in two sections on the large folding plate. It shows the ships in the ice, a surveying party to the foreground, and the view away from the ship towards Spitzbergen (Svalbard). The expedition was the earliest polar subject to feature in the Panorama, which was exhibited again the following year (an 1820 edition of the present booklet was also published).

149. Stefánsson, Vilhjálmur. *Unsolved Mysteries of the Arctic.* *New York: The Macmillan Company, 1939.* £125

Reprint (1st ed. 1938). 8vo. p. [xviii], 381; 4 sketch maps; good in the original cloth, which is a little faded on the spine. A presentation copy, inscribed on the flyleaf: "To Sandy Glen, an American copy slightly in advance of the slightly improved London edition, from his friend Vilhjálmur Stefánsson New York March 5 1939".

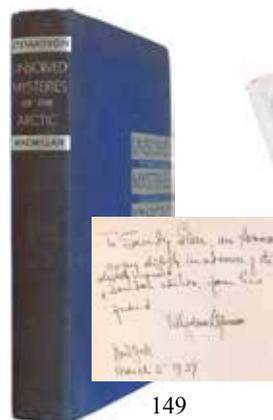

AB 16873. Stefánsson discusses five Arctic 'mysteries', including the fate of John Franklin, of Thomas Simpson, and 'How did Andrée die?'. This copy was presented by the author to Alexander Richard 'Sandy' Glen, who led the Oxford University Arctic Expeditions of 1933 and 1935-6.

150. Swan, Robert & Roger Mear. *In the Footsteps of Scott, Antarctic Expedition 1984-6* [Sponsorship prospectus and Publicity Pack]. £50

Together two vols. 4to. First item: 100ll., printed to rectos only; a few anonymous annotations at front, minor finger-soiling, else very good in the original ring-bound wrappers; second item: four newsletters, pp. [4], [4], [4], & 14, bound with 6 postcards, one press photograph, a folding map, and four order forms for merchandise, book, etc., in printed card wrappers with plastic strip to spine.

Swan and Mear, together with Gareth Wood, in 1985-6 made the longest unassisted march to reach the South Pole. The first document here was

designed "to illustrate the scope, nature and ambition of the Expedition and to provide Company publicity decision-makers with an indication of the magnitude of the sponsorship opportunities" (Preface), and offers an overview of the expedition and its aims, information about sponsorship opportunities and details of companies already involved, and biographies of the two main leaders. The second item offers a sort of publicity pack, with newsletters, postcards, order forms, etc.

151. Swayne, Major H. G. C. *Through the Highlands of Siberia.* London: Rowland Ward, Limited, 1904. **£775**

First edition. 8vo. pp. xiv, 259, [9, ads.]; illu. from photos., one folding map, one folding plan of stalks; very good in the original cloth, gilt, slightly rubbed to extremities, marked to upper board, with Rowland Ward 'zebra-skin' endpapers, in the original dust-wrapper, which is neatly restored, slightly chipped.

Czech Asia p. 209. This is a classic account of a shooting trip from Moscow across the Urals to the Altai Shan. The author relates his hunting experiences, largely for sheep and ibex, using Demidoff's *After Wild Sheep in the Altai and Mongolia* as guide, but he also provides much information concerning the country through which he and his companion travelled.

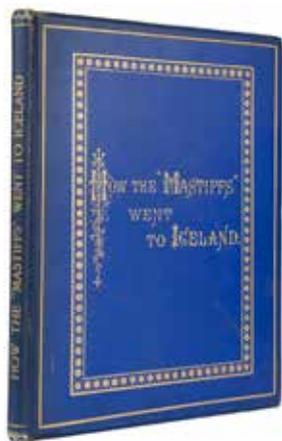

152. [Tristan da Cunha.] A group of 32 letters sent from inhabitants of the island of Tristan da Cunha, to Molly Jose of the Vicarage, Lamberhurst, Kent, dating from 1920 to 1939. **£1,250**

8vo., various paginations mainly 2pp. & 4pp. but a few longer letters, some 100pp. in all, addressed to "Mrs Jose", "Molly Jose" or "Madam", one letter incomplete, all without the original envelopes, together with i) an 8pp. summary (probably in Jose's hand) describing the background to the letters, ii) a letter and envelope sent to Jose from Victoria Forester on Buckingham Palace letterhead and dated 25 Nov. '35, thanking her for sending the Queen letters from "two women in Tristan da Cunha", iii) a single issue of the Tristan da Cunha News Letter for 1932, and two magazine cuttings.

In 1919 Mary Jose, who with her husband and children lived at the Vicarage in Lamberhurst, Kent, responded to an appeal in *The Times* "to send things to the Islanders [of Tristan da Cunha] as for the first time for 2 or 3 years a ship was going . . . I did up a big parcel of things - soap, matches, needles, hair pins, chocolate, tea, tape, etc. - & I wrote a long letter & addressed it to 'An Inhabitant of T. da C.' I enclosed an addressed envelope & papers & said I should so like to get a letter". The resulting correspondence continued for the next 20 years, with Mary Jose sending gifts to the Islanders, and they replying and occasionally sending back gifts of their own. The present collection comprises some of the letters received by Jose in those years, written by members of the small Tristan community - Mrs. R. F. Glass and her children Clement, Mary and Lillian, Frances Repetto (descended from an Italian shipwrecked

on the island), Mr and Mrs Arthur Rogers, and their daughter Martha Rogers. The correspondence gives an idea of the hardships faced on this small island in the heart of the South Atlantic, and speaks of the difficulties faced when potato harvests failed, when the weather closed in, or when supplies ran short. Infrequent visits by passing whalers and passenger liners presented the Islanders with opportunities to write to their benefactor, and the letters contain descriptions of the frenzied activity that followed the call of "Sails Ho!" when a ship stove into view. Several of the writers described for Jose their forays to the neighbouring Inaccessible and Nightingale islands, where sea birds were gathered and fat prepared for the winter months ("the dripping & fat as we call it his [sic] very good for frying fish or potatoes" - letter from Martha Rogers, April 11, 1935). References appear in the letters to the research ship *Discovery*, to the *Empress of France* and other similar vessels, and to a Norwegian whaling factory and other Norwegian visitors, all of which put in near to the island for provisions and to offload mail and stores - which included on one occasion window panes sent by the King, and a gramophone from the Queen. The Islanders also send news of the various missionaries based on the island, with references to the one-time residence of Mr. Rogers, and to the contemporary stays of Mr. Pooley, Mr. Lindsey, the Rev. Partridge, and the Rev. Wilde. During the period a storehouse and hospital were constructed, the church expanded, several new houses built, and the population increased from c. 150 islanders to nearly 200. At some point Mary Jose sent a group of the letters she had received from some of the Islanders to Queen Mary, and the correspondence includes a reply sent from Buckingham Palace thanking her for sending them (it is not clear whether they were returned to her). The infrequency with which mail left Tristan da Cunha means that letters from the island are relatively scarce, and the present correspondence provides a fascinating insight into the lives of some of the remotest subjects of the British Empire.

153. Trollope, Anthony. How the "Mastiffs" Went to Iceland. *London: Virtue & Co., Limited, 1878.* £600

First edition. 4to. pp. [v], 46; map frontis., 14 uncoloured lithographs from sketches by Mrs. Hugh Blackburn, two mounted real photographs; foxing to map and some of the plates, small watermark affecting margins of two plates, else very good in the original cloth, gilt, a.e.g., slightly rubbed. Sadleir 51. Anthony Trollope joined the Mastiff, the yacht belonging to his friend John Burns (later Lord Inverclyde), for its voyage to Iceland. 154. [Trybom, Filip, Swedish zoologist.] A collection of calling cards and similar items, presented to the Swedish Zoologist F. Trybom. £125

Together 58 calling cards, varying in size, occasionally with a brief note from the donor, plus 8 other miscellaneous items (invitations, menus, tickets), mainly in very good condition though with occasional creases.

Arvid Filip Trybom (1850-1913) was a Swedish zoologist who took part in several major expeditions, including A. E. Nordenskiöld's 1876 expedition to the Yenisei river. This collection of calling cards reveals the wide network of contacts he made in Sweden and abroad. The names on the card include Erich von Drygalski, German geographer and Polar explorer; Frans Kjellman (two different cards), Swedish botanist and member of the Vega Expedition under Nordenskiöld 1878-80; Herman Sandeberg, with whom Trybom made an expedition to the Kola Peninsula in 1877; Andreas Hovgaard, Lieutenant in the Danish Navy who in 1882-3 led the Dijnphna Expedition to the Kara Sea; Yngve Sjöstedt, the Swedish naturalist who led expeditions to East Africa; and two examples of Trybom's own calling card. The other miscellaneous items include a ticket to the Zoological Society of London for 1907, made out to Trybom and signed by the secretary, and an 'At Home' invitation to Trybom from Hugh R. Mill, adviser to several British Polar expeditions (and a supporter of Ernest Shackleton).

155. Wallsee, H. E. *A Voyage to Iceland Spitzbergen and Norway.* Lübeck: *H. G. Rahtgens*, n.d. [1898]. **£125**

First edition. Small 8vo. pp. 154; eng. frontis., photo. illusts., 2 folding maps; some water-marking to lower inner margins, else good in the original limp cloth gilt.

According to the lettering of the upper cover, this description of the voyage from Germany to Scotland, Iceland, Spitzbergen and the coast of Norway was "Presented by Hamburg-Amerika Linie", presumably by way of a guide book for their customers. The first of the folding maps shows the route of 'The Great Northern Cruise arranged by the Hamburg-Amerika Linie'. The book seems relatively uncommon, and we can locate only three copies on Worldcat.

156. Watkins, H. G. 'The Cambridge Expedition to Edge Island.' Reprinted from *The Geographical Journal*, vol. LXXII no. 2, August 1928. **£35**

First separate edition. 8vo. pp. [117]-143; two leaves of photo. illusts., one sketch map; very good in the original printed wrappers, slightly bumped to one corner, marked to upper wrapper.

Watkins led this expedition to the island just east of Spitsbergen, the members of which included H. T. Morshead, of the 1920s Everest expeditions.

157. [Whaling.] Caution to shipmasters visting [sic] the Coasts of Greenland. *N.p.*, n.d. ?1850s. **£25**

A bifolium, printed to first two pages on "J. Whatman" watermarked paper, text in two columns (Danish and English), MS insertions to second page; very frayed and stained with slight loss to lettering in centre of printed pages.

This document, issued by the Directors of the Royal Greenland Company in 1850, permits the bearer "to navigate the coast of Greenland". According to the MS entries, this exemption was granted to Alexander Ray (or Kay) of the Tay Whale Fishing Company for a ship (name indistinguishable) operating out of Dundee into the Davis Straits; this document would have been kept on board ship, to be shown to Danish inspectors in Greenlandic waters.

158. Williams, Miss Marguerite. *Arctic Circle Cruise. Reminiscences of a Holiday among the beautiful Norwegian Fjords, also visiting the Lofoten Islands and the North Cape, on the Steamship "Montroyal" July 27th to August 19th, 1926.* London: *British and Continental Touring Club, Ltd.*, n.d. c. 1926. **£45**

?First edition. 8vo. pp. 48; frontis. and other illusts. from photos.; previous owner's inscription to flyleaf, else very good in the original string-tied printed wrappers, a little soiled.

This unrecorded pamphlet describes the nearly 5,500 mile cruise to the North Cape with visits en route. The illustrations shows both views of the places visited and also portraits of some of the people on the cruise and those they saw.

159. Wright, C. S. 'The Ross Barrier and the Mechanism of Ice Movement.' Reprinted from 'The Geographical' Journal for March 1925. **£45**

First separate edition. 8vo. pp. 198-220; sketch map, 2 leaves of photo. illusts.; slightly creased in the original printed wrappers.

Not in Spence. "This paper on the Ross Barrier and the mechanism of ice movement is based on the Glaciological Report of Capt. Scott's last Antarctic Expedition, but extends to a slight extent certain views of the mechanism of ice movement dealt with in that Report" (p. 198).

160. Young, George. *The Mariner's Refuge: a discourse to Seamen, delivered in Cliff-Lane Chapel, Whitby, on Sabbath, Aug. 5, 1810: to improve the melancholy fate of a part of the crew of the Aimwell of Whitby who were lost in the Greenland seas, May 27, 1810.* *Whitby: printed and sold by R. Rodgers*, 1811. **£175**

First edition. 8vo. pp. 44, [2, blank]; previous owner's inscription to title-page, edges trimmed, minor browning, in recent printed wrappers.

The text of this pamphlet is taken up with Young's discourse, but the advertisement leaf on p. 4 notes: "A Melancholy accident which occurred in the Greenland Seas, during the season of the Whale-Fishing in 1810, gave occasion to the following discourse. On May 27 [1810] a boat with six men, belonging to the Aimwell of Whitby, was struck by a large whale, which they were attempting to kill, and was shivered to pieces ...". George Young was minister of Cliff Lane Congregational Church from 1806 to 1848; this was his second published work.
